

Ari + Ozobot Editor

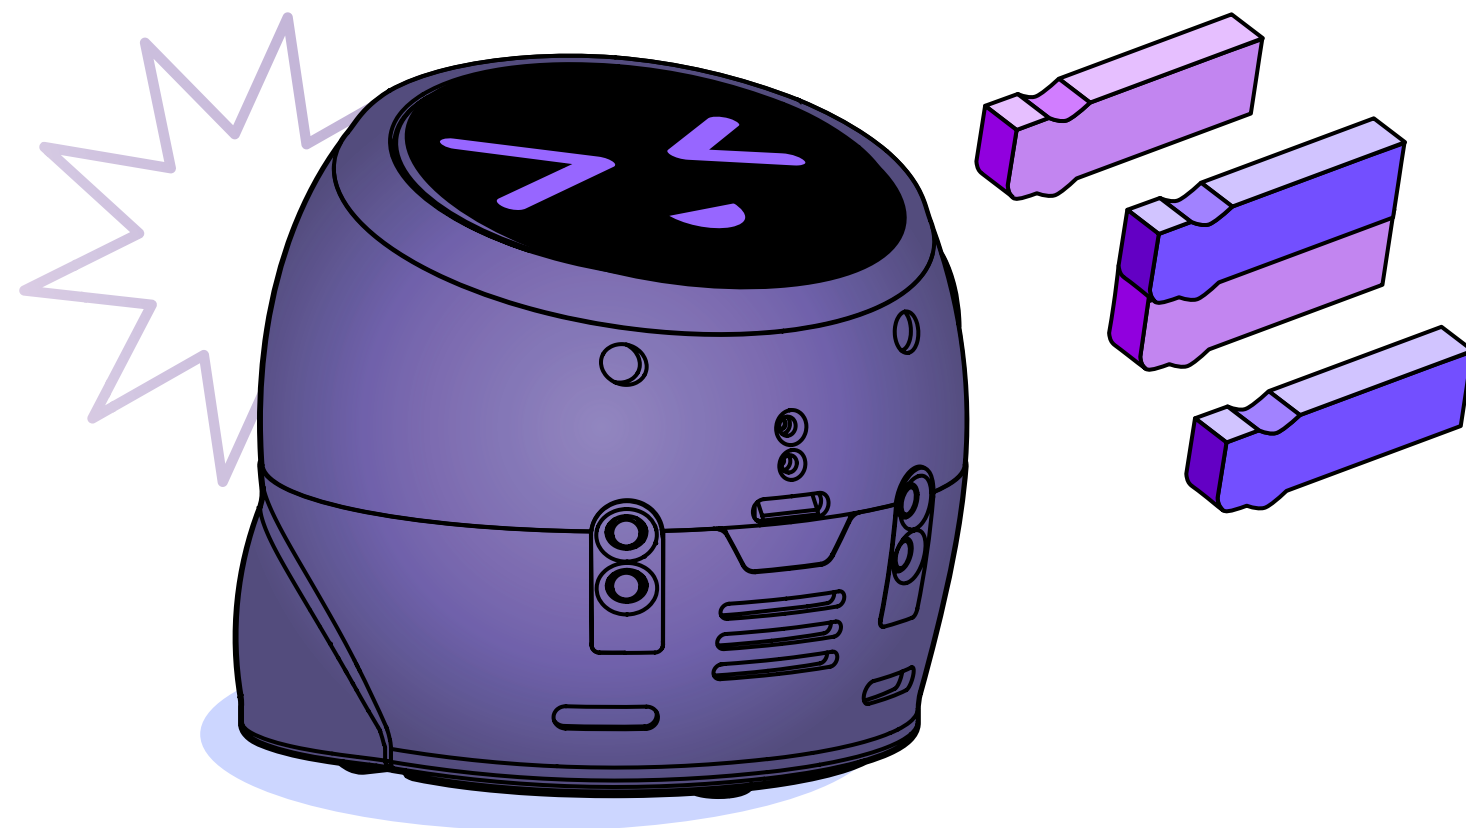

These are the devices and browsers that are compatible with Ozobot Ari and the Editor programming tool.

The Ozobot Editor is our newest tool to create Block-based and Python programs for Ari and other Ozobot robots. It brings new features including real-time communication, multi-bot programming, and the ability to run multiple blocks concurrently.

NOTES:

- For browsers, use the latest version supported by your OS.
- • Devices should support minimum Bluetooth 4.2, with Bluetooth 5.0 or later recommended.
